Kolorcraft Group recognises that concern for the environment should be an integral and fundamental part of the business.

We are aware that our operations have an impact on the environment in a number of ways and are fully committed at every level to achieving continuous improvements in our environmental performance and the reduction on our impact on the environment.

The company has undertaken to implement, manage and maintain an environmental management system that is compliant to the nationally and internationally recognised Environmental Management Standard:

**BS EN ISO 14001:2004**

Our practices and procedures as part of our management system include:-

Carrying out regular and detailed assessments of our aspects and impacts on the environment.

Ensuring that we are aware and compliant to applicable environmental regulations and legislation

The reduction of all forms of waste through waste minimalisation plans and programmes.

The continued reduction of raw material use wherever possible.

The continued reduction of use of all forms of natural resources wherever possible.

The continued reduction of emissions and all forms of pollution on the environment.

To ensure that this is achieved and maintained, our environmental management system, this environmental policy and all targets and objectives that we have set shall be subject to regular audits and review, and discussed at board level.

This environmental policy is communicated and understood by all staff within the company through regular training and communication. We also select and use suppliers on the basis of their commitment and continual improvement on their impact on the environment.

This policy is available to all interested parties including the public.

**Phil Findley**
